

WHY TRANSITION?

Easy to use.
Simple web dashboards for staff and users.

Negotiate directly with local internet carriers and procure your own circuits.

Affordable support and software subscription fee that aligns with your occupancy.

The transition usually pays for itself within the first 6 months!

Highly secure and compliant infrastructure.

Expense	isofy	Others
Primary Internet	~\$850	~\$1,750

HOW DOES IT WORK?

Use your existing compatible equipment!

No need for new network switches or access points.

- Send a list of your existing equipment inventory
- We confirm compatibility and send a proposal
- We take care of all the details
- Transition over a weekend to reduce downtime
- On-site support to ensure seamless user onboarding

WHAT WILL I NEED?

isofy Hardware

- Advanced Firewall
- Wi-Fi Controller
- Power Distribution

Services

- Project Management
- Programming
- Installation & Travel

Proposal Acceptance

Identify available internet circuits at your site.
We'll help if you need.

Sign contracts with your selected internet carriers.
New circuits typically take 60-90 days.

We'll order your isofy equipment and program everything.

An isofy engineer installs your new equipment and transitions your site over a weekend.

An on-site support tech helps your users and staff get connected on the first day.
